VIEWING THE GAME SCREEN

The basic screen layout is shown below. This may change if you are playing with special rules (see page 17).

HOW TO PLAY

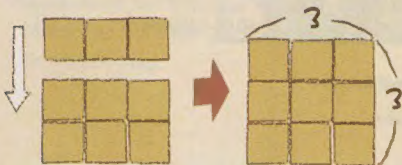

Penko will advance forward towards the Goal when you move the falling blocks to make chains. Read this section to study up on the basic rules of the game and how to move blocks.

BASIC RULES

Advance Penko (your spaceship) so that it reaches the Goal within the time limit.

HOW TO ADVANCE PENKO

Penko is powered by the energy produced when blocks are chained together. First, drop blocks until you form a 3x3 group. The blocks will change into chain blocks, and a chain will begin.

CHAINING

Continue the chain by dropping more blocks onto it and forming 3x3 groups. The bigger the chain, the further Penko will advance.

BE CAREFUL WHILE CHAINING

If you drop a block and it doesn't make a 3x3, or if the blocks reach the top of the screen, the chain in progress will end. Also, keep in mind that after a set period of time, the blocks in the chain will break apart and the chain will end.

HOW TO PLAY

WHEN A CHAIN ENDS...

When a chain ends or breaks, the chain blocks will turn into Coins, which will be added to your total Coins. The larger the chain, the more Coins you'll get. Coins can be used when buying Art or Effects on the Settings Screen.

GAME OVER

The game ends when you fail to reach the Goal within the time limit, or when the stack of blocks reaches the top of the screen without making a chain. The game can also end if you fail to fulfill specific conditions in certain stages with special rules.

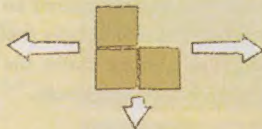

HOW TO MOVE BLOCKS

Use the +Control Pad and buttons to move blocks.

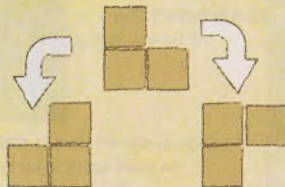

MOVING BLOCKS (+Control Pad)

You can use the +Control Pad to move blocks around the screen until they land on the bottom of the screen or onto other blocks.

ROTATING BLOCKS (A Button / R Button, B Button / L Button)

You can rotate blocks clockwise with the A Button or the R Button, and you can rotate them counterclockwise with the B Button or the L Button.

HOW TO PLAY

BEWARE OF THE BLACK BLOCKS

Black blocks may drop down in specific stages or when you are playing against an opponent. Black blocks cannot be used to make chains, but when blocks that they are in contact with create chains, the black blocks turn into normal blocks.

BE CAREFUL OF BREAKDOWNS

Chains will not be maintained for the usual time in stages where Penko has malfunctioned. Form your chain quickly before the chain blocks break apart!

Chain blocks will start to shake when they're about to break apart, so hurry and make your chain.

SPECIAL RULES

There are special rules for some stages.

DEFEAT THE ENEMY

Use Penko's beak drill to attack the enemy. Clear the stage by dropping the enemy's power down to 0 before the time limit expires.

DON'T LET THE ENEMY WIN

In this stage, you win by reaching the Goal before the enemy. When one of your chains breaks apart, black blocks will drop onto your opponent, and vice-versa.

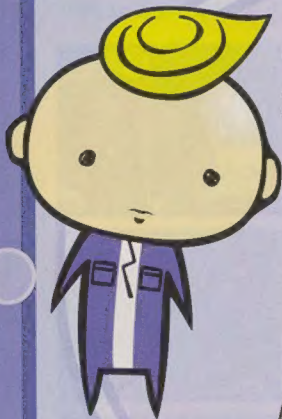

CATCH THE PRINCESS

Clear the stage by flying straight ahead to catch the Princess.

ENDLESS MODE

Select a Dimension (difficulty) and fly endlessly through space.

HOW TO PLAY

Aim for the Goal in each Dimension. If you pass the Goal in a Dimension, you advance on to the next Dimension and continue your flight through space. However, if you fail to reach the next Goal within the time limit, the game is over.

If you select "Quit" from the Pause Menu or select "No" from the Retry Screen after a game over, the game will end and you'll go on to the Results Screen.
